KANSOM AUSTRALIA THE SEA SAUCE JOURNEY

In 1992, Kansom Australia created the World's First Commercial Abalone Sauce made from Australian Wild Caught Abalone, and from a passion and desire to deliver delicious and authentic seafood products and sauces. In 2018, our Abalone Sauce evolved into our new Sea Sauce Collection.

Since Kansom Australia's inception in 1985, we have been passionately innovating and making all our Australian Seafood products, here in Australia, and this is no exception with our Sea Sauces. They are purposely made to be excellent in taste and nutrition, for people who simply want the best.

Our Sea Sauces are not flavoured or imitation sauces. Did you know that the words "flavoured", "flavour" and "flavouring" do not necessarily mean that the flavour is real, or made in any way from the real product? For example, "Abalone Flavour" is not required by law to have any Abalone in it. It may well be made of any combination of seasonings. Our products are made from the real thing, made from wild harvested sea products such as Abalone and Scallop, and contain no added MSG. As they are natural, they are full of real flavour and you only need to use a little. The colour and flavour of our Sea Sauces may vary slightly due to natural seasonal changes, and this is a demonstration of their authenticity.

A serious gourmet collection of seafood inspired sauces to accompany and enhance any meal or culinary experience.
